22 The Way Forward

For the Malaysian railway industry, TWA Malaysia is among the few market leaders which has gained international recognition especially in the Asia Pacific Region.

About Us

TWA Malaysia is a company incorporated in 2009, engaged in works related to the Malaysian railway industry. Prior to the company's incorporation and for more than 25 years, its co-founders had serviced companies handling the Malaysian railways whilst garnering much experience and recognition. Thereafter, being at the helm of **TWA Malaysia** for just about ten years, they had led the company to grow from a small local outfit to being among the few established local key industry players.

For the Malaysian railway industry, **TWA Malaysia** is among the few market leaders which has gained international recognition especially in the Asia Pacific Region. Its tamping machine simulator is the only one in Asia, enabling the company to provide technical training services to organisations in the Asia Pacific and beyond. **TWA Malaysia** also proudly holds sole distributorship rights to the supply and maintenance of railway machinery by the Austrian-based company, Plasser and Theurer, the world's leading manufacturer of track maintenance machines.

Today, **TWA Malaysia** has further built on its resources and integrated its strengths, diversifying into businesses involving engineering solutions, construction, and manufacturing.

**We are committed to
generating positive impacts
on our employees,
customers, partners, and
community.**

Our Mission

To achieve excellence in customer satisfaction, with zero compromise on quality, safety, and speed of delivery of supplies and services.

Our Vision

To be a reputable market leader in our respective lines of business and to generate positive impacts on our employees, customers, partners, and community.

Our Commitment

- Responsible and ethical leadership
- Clear organizational structure and stable supply of resources
- Conducive working environment which promotes professionalism, respect, honesty, and teamwork
- Competent and skilled human resources maintained through continuous training and development based on stringent industry standards.
- Continuous monitoring and auditing of work processes based on due diligence
- Continuous technological and product development and innovation
- Strong lifetime partnership with customers by prioritizing solutions based on their needs and concerns.
- Positive engagement and communication with all stakeholders, which include employees, government and regulatory bodies, suppliers, partners, customers, and the community within which we operate.

RAILWAY MACHINERY & MAINTENANCE

Supply of new machinery

We supply new on-track maintenance machinery, small maintenance machinery, locomotive, coaches, tools, and spare parts. We are the sole distributor of railway track machines by Plasser & Theurer, Austria, a renowned leading manufacturer of track maintenance machines worldwide. We serve as agents and strategic partners to Shin Sung System Company Limited (Korea) as well as Robel (Germany). We also have a collaborative agreement with PT. Industri Kereta Api (Indonesia).

Servicing and maintenance of track maintenance (mechanise) machines

We have more than 10 years' experience in maintenance of various mechanise machines from the simple mechanical, electric and hydraulic systems such as the ballast regulator to the highly sophisticated machines such as the track and catenary recording car. Many of our technical staff even possess more than 20 years' experience in the field, being skilled technicians trained and guided by Plasser and Theurer, Austria. Technical support is available to us by Plasser Far East Limited (Hong Kong).

After sales services

We provide after sales services and supply of original equipment manufacturer (OEM) spare parts. The use of OEM spare parts ensure good machine performance and quality outputs. We have dedicated staff and workshops dealing with repair, services and overhauling of various parts and components of the machines. We are also authorised in overhauling various types of diesel engines such as the Detroit and Deutz engines.

Technical Training

We provide indoor and outdoor training of the various mechanise machines for basic and advanced operators. Our tamping machine simulator is the only one available in Asia. Hence, we are ready to provide training services to organizations in the Asia Pacific and even beyond . Our experienced railway professionals can also provide technical hands-on training and lectures on permanent railway topics as required by clients. Well-equipped training and discussion rooms are available at our business premises.

ENGINEERING SOLUTIONS

Powered by our engine, mechanical, and electrical expertise, we provide engineering solutions to organizations from a wide range of industry such as oil & gas, petrochemical, and commercial industries.

CONSTRUCTION

Our services include design, engineering, project management and building construction

MANUFACTURING

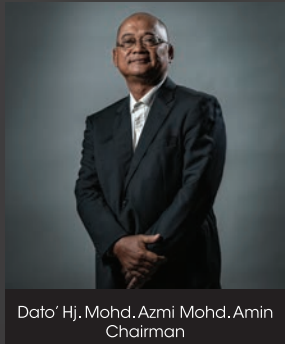

Our manufacturing capability is built on partnerships with organizations in different manufacturing sectors.

Professional
and exemplary
LEADERSHIP breeds
commitment and
BUSINESS SUCCESS.

Our Achievements Premier Technical Service Team

Our sales of machinery is backed by superior after-sales technical support services. Our technical support team is highly experienced and committed. We are the only provider of such services for Plasser & Theurer machines in the Asia Pacific, and among the few in the world. This same exclusive service is also provided for machinery procured from our other business partners such as Robel and Shin Sung System Limited (Korea).

Our Achievements

First and Only Tamping Machine Simulator in Asia

Our tamping simulator allows railway operator training to be carried out much quicker than it would be possible on-site, with users experiencing real time working environment without any risk of damaging the track and the machine. It reduces the training period and allows higher cost efficiency. It also enables the trainer and the participants to evaluate the simulated performance together, and to learn step-by-step how to tamp the track optimally. We are ready to provide training services to organizations in the Asia Pacific and even beyond.

**Over the years we
have earned
the respect and
trust of our
international
partners.**

International Partnerships

Malaysia's sole distributor of railway track machines by Plasser & Theurer, Austria, a renowned leading manufacturer of track maintenance machines worldwide.

Customer Testimonials

Keretapi Tanah Melayu Berhad

Company No. 225943-T

16 October 2015

To whom it may concern

Dear Sir/Mdm,

We herewith confirm that KTMB Malaysia successfully operates, among other track maintenance machines from Plasser & Theurer, 3 (three) units **Unimat Compact 08-3S** (m/c nos. 1205; 1336 and 1337) and 1 (one) unit **09-32CSM** (m/c no. 3374) for gauge 1000mm.

We are satisfied with the performance of these machine types. Service has always been provided whenever required in due time.

Best Regards,

MOHD AFFENDI HUSSAIN
Senior Engineer / Depot Manager
